WITHDRAWN REJECTIONS

4. The 35 U.S.C. §102 rejection made of record in the office action mailed June 9, 2010, pages 3-4, paragraph #6 has been withdrawn due to Applicant's arguments in the response filed August 12, 2010.

REJECTIONS

5. **The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.**

Claim Rejections - 35 USC § 102

6. Claims 1-14 and 32 rejected under 35 U.S.C. 102(e) as being anticipated by Kuepfer et al. (U.S. Patent Application No. 2004/0254325).

Kuepfer discloses an embossed release paper comprising at least paper as a support and an film provided on the paper, the upper part of the cured film having been embossed (*page 5, para. [0064J]*). The film has a composition with a softening point of 40°C or above (*page 5, para. [0069J and [0070J and page 6, para. [0072J*) and comprising a product of a reaction of an isocyanate compound with a (meth)acrylic compound containing an a (meth)acryloyl group and reactive with the isocyanate compound (*page 3, para. [0037J and [004J*). Kuepfer further discloses film further comprises 1 to 70% by weight of a film forming resin and 0.5 to 20% by weight of a silicone compound (*page 5, para. [0069J and [0070J and page 6, para. [0072J*). The film has a multilayer structure of at least two layers (*page 5, para. [0064J*).

The preamble “for synthetic leather production” is deemed to be a statement with regard to the intended use and is not further limiting in so far as the structure of the product is concerned. In article claims, a claimed intended use must result in a *structural difference* between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. MPEP § 2111.02.

The limitations “ionizing radiation cured” and “produced by a process according to …” are method limitations and do not determine the patentability of the product, unless the process produces unexpected results. The method of forming the product is not germane to the issue of patentability of the product itself, unless Applicant presents evidence from which the Examiner could reasonably conclude that the claimed product differs in kind from those of the prior art. MPEP 2113. Furthermore, there does not appear to be a difference between the prior art structure and the structure resulting from the claimed method because Kuepfer discloses a cured release paper (*page 1, para. [0005J*).

ANSWERS TO APPLICANT'S ARGUMENTS

7. Applicant's arguments in the response filed August 12, 2010 regarding the previous rejections of record have been considered but are moot since the rejections have been withdrawn.
